Your Turn!

What class are turtles?

Turtles are reptiles!

Let's try another one..

What class is a penguin?

Penguins are birds!

Let's try another one...

What class are whales?

Whales are mammals!

Let's try another one...

What class are stingrays?

A top-down view of a dark-colored stingray resting on a sandy seabed. The stingray's body is flat and diamond-shaped, with its head towards the top. Two large, prominent eyes are visible on the top surface of its head. The background is a mix of sand and some greenish-brown algae or coral fragments.

Stingrays are fish!

Let's try another one...

What class are salamanders?

Salamanders are amphibians!
